

Double-wall Underground Storage Tanks

The original UL1746 tank design.
Established in 1971.
Over 50,000 tanks currently in service.

Durable Construction

Double-wall steel tank built to UL 58 standards.
Externally corrosion protected with 100 Mils bonded FRP resin.
Provides the strength of steel and the corrosion resistance of fiberglass.
30 year corrosion protection warranty.
5 year workmanship and materials warranty.

Detailed quality control program.

In-plant monitoring by Underwriters Laboratories.
Each tank is holiday tested using 35,000 volt testing equipment.

Custom fitting and fitting placements available.

Available in single and multiple compartment configurations.

No troublesome plastic isolation bushings to crack or cross-thread, leading to potential leakage.

Compatible with all motor fuels.

THE ULTIMATE DOUBLE-WALL TANK.
